### DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-10, 12 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. The claims require the crosslinking mechanism to displace a halogen atom. There is no halogen containing component identified in the claims. It is unclear how and where the halogen component is to react with the crosslinker.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-10, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaeding US 5,855,972.
6. The rejection set forth under 35 USC 103 set forth in the paper mailed 11/30/05 is deemed proper and is herein repeated.
7. Applicants remarks have been fully considered but have been found not persuasive.

Art Unit: 1713

8. The primary point of contention with respect to the Kaeding is that the Kaeding patent shows a "stop". Applicants argue that the "stop" is proof that there is minimal crosslinking in the Kaeding composition. This is not persuasive. The "stop" of Kaeding is not seen to be germane to the patentability of the instantly claimed invention.

Kaeding references the claimed crosslinking agents at column 14 lines 55+. Further there are no limitations in the claims with respect to the amount or degree of crosslinking. The claimed crosslinking agents are known and have been used in crosslinking of the claimed polymers. As such the incorporation thereof is rendered prima facie obvious.
